Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

Academic Program Description Form

University Name: Al-Nahrain university
Faculty/Institute: Faculty of pharmacy
Scientific Department: Pharmaceutics department
Academic or Professional Program Name: Bachelor
Final Certificate Name: Bacheloria degree
Academic System: semesters

1. Program Vision

The vision of pharmaceuticals department is to be focus on innovative work in research and education that related to pharmaceuticals and drug delivery to achieve superiority in this respect

2. Program Mission

The mission of pharmaceuticals department involve two target one related to education and training mission and other related to research and innovation mission, the first target attained by offering undergraduate and postgraduate student with essential knowledge for understanding the physicochemical and biopharmaceutics aspect of dosage form design , evaluation and manufacturing whereas the second target accomplished by performing and directing new knowledge to external partner to amend drug delivery and patient care.

3. Program Objectives

- 1/ submit education and training on scientific coarse that organized by the department
- 2/ impart professional skill on drug preparation, synthesis and evaluations
- 3/ offer scientific concept essential for lifelong learning and valuable knowledge for rational, effectiveness and safety of the drugs
- 4/ create synchronized between coarse learning outcome and graduate attribute properties
- 5/ activate the role of department in high quality research and innovation

4. Program Accreditation

Do not have program accreditation? And from

5. Other external influences

Is there a sponsor for the program?

6. Program Structure

Program Structure	Number of Courses	Credit hours	Percentage	Reviews*
Institution Requirements	10	43	20%	basic
College Requirements	10	43	20%	basic
Department Requirements	10	43	20%	basic
Summer Training	2	–	–	–
Other				

* This can include notes whether the course is basic or optional.

7. Program Description

Year/Level	Course Code	Course Name	Credit Hours	
			theoretical	practical
First	10301102	Principle of pharmacy practice	2	–
	10301109	pharmaceutical calculation	2	2
Second	10301218	Physical pharmacy I	3	2
	10301225	Physical pharmacy II	3	2
Third	10301334	Pharmaceutical technology I	3	2
	10301339	Pharmaceutical technology II	3	2
Forth	10301447	Industrial pharmacy I	2	2
	10301454	Industrial pharmacy II	3	2
Fifth	10301557	Industrial pharmacy	3	2

		II		
	10301568	Dosage form	2	-
	10301569	Pharmaceutical biotechnology	1	-

8. Expected learning outcomes of the program

Knowledge	
<p>1. Identify the types and forms of medicines.</p> <p>2. Methods for preparing the active substances in the form of full drug doses</p> <p>3. Studying the stability of doses prepared in various forms.</p>	<p>4. Studying the pharmacological effect, its effectiveness, and its mechanism of action inside the body.</p>
Skills	
<p>1/The skills goals special to the course.</p> <p>2/Acquisition of skill in installation and preparation methods</p> <p>3/ Acquiring the skill of knowing how to maintain stability for as long as possible</p>	<p>4/ Acquisition of skill in diagnosing separated compounds</p>
Ethics	
<p>Methods for preparing the active substances in the form of full drug doses</p>	<p>Studying the pharmacological effect, its effectiveness, and its mechanism of action inside the body.</p>
<p>Studying the stability of doses prepared in various forms.</p>	

9. Teaching and Learning Strategies

Power Point Presentation, Tutorials (Pen and Whiteboard), Problem Solving, Practicalities

Scientific researches
Laboratory teaching

10. Evaluation methods

Quizzes
reports
Mid term Exam
Final Exam

11. Faculty

Faculty Members

Academic Rank	Specialization		Special Requirements/Skills (if applicable)		Number of the teaching staff	
	General	Special			Staff	Lecturer
	pharmacist	pharmaceutics	-	-	3	4

Professional Development

Mentoring new faculty members

Briefly describes the process used to mentor new, visiting, full-time, and part-time faculty at the institution and department level.

Professional development of faculty members

Briefly describe the academic and professional development plan and arrangements for faculty such as teaching and learning strategies, assessment of learning outcomes, professional development, etc.

12. Acceptance Criterion

(Setting regulations related to enrollment in the college or institute, whether central admission or others)

13. The most important sources of information about the program

British Pharmacopeia
United state pharmacopeia
European pharmacopeia
Applied Bio pharmaceuticals and pharmacokinetics
Shargel and yus
Pharmaceutical Calculation by Stoklosa
Physical Pharmacy by Alfred Martin et al.
Pharmaceutical Dosage forms and Drug Delivery Systems By Haward A. Ansel;
latest edition. And Sprowel's American Pharmacy.
Shargel L, Yu AB, (Eds.), Applied Biopharmaceutics and Pharmacokinetics.
The Theory and Practice of Industrial Pharmacy by Leon Lachman et al.

14. Program Development Plan

Personal development - increasing knowledge - scientific discussions - cultural events

- Please tick the boxes corresponding to the individual program learning outcomes under evaluation.

Course Description Form

1. Course Name:					
<i>Principles of Pharmacy Practice</i>					
2. Course Code:					
10301102					
3. Semester / Year:					
1 st semester/ 1 st year					
4. Description Preparation Date:					
18/2/2024					
5. Available Attendance Forms:					
Theory/ attendance					
6. Number of Credit Hours (Total) / Number of Units (Total)					
30					
7. Course administrator's name (mention all, if more than one name)					
Name: Dr rawaa Email:					
8. Course Objectives					
Course Objectives		1/ Learn the rules of mathematic calculations. 2/ Learn the rules of measurement systems and the relation between them. 3/ Learn the rules of components and types of prescriptions. 4/ Learn the rules of calculating doses and reducing or enlarging formulas. 5/ Learn the rules of values description in percentage and ratio strength. 6/ Learn the rules of calculating density and specific gravity.			
9. Teaching and Learning Strategies					
Strategy		Power Point Presentation, Tutorials (Pen and Whiteboard), Problem Solving, Practicalities			
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method

1	2	mathematic process	Review on some mathematic process	Power Point, Problem Solving, Practicalities	Formative, summative, quize, exam
2	2	types measurement systems	Explicit the types measurement Systems	Power Point, Problem Solving, Practicalities	Formative, summative, quize, exam
3	2	Give practice Solving problems	Solving the problems	Power Point, Problem Solving, Practicalities	Formative, summative, quize, exam
4	2	components and types prescription	Explain the components and types of prescription	Power Point, Problem Solving, Practicalities	Formative, summative, quize, exam
5	2	Give practice Solving problems	Solving the problems	Power Point, Problem Solving, Practicalities	Formative, summative, quize, exam
6	2	ratio, proportion and percentage	Describe the ratio, proportion and percentage	Power Point, Problem Solving, Practicalities	Formative, summative, quize, exam
7	2	Give practice Solving problems	Solving the problems	Power Point, Problem Solving, Practicalities	Formative, summative, quize, exam
8			Mid term Exam		
9	2	Give information Density, specific gravity	Estimate the Density, specific gravity.	Power Point, Problem Solving, Practicalities	Formative, summative, quize, exam
10	2	Give practice Solving problems	Solving the problems	Power Point, Problem Solving, Practicalities	Formative, summative, quize, exam
11	2	Compute the dose of the drug	Compute the doses of the drug	Power Point, Problem Solving, Practicalities	Formative, summative, quize, exam
12	2	Give practice Solving problems	Solving the problems	Power Point, Problem Solving, Practicalities	Formative, summative, quize, exam
13	2	reduce or enlarge the formula	Explicit how can reduce or enlarge the formula	Power Point, Problem Solving, Practicalities	Formative, summative, quize, exam
14			Final Exam		

11 Course Evaluation

Quizzes 5%
Reports 5%
Mid term Exam 20%
Final Exam 70%

11. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Pharmaceutical Calculation by Stoklosa
Main references (sources)	Pharmaceutical Calculation by Stoklosa
Recommended books and references (scientific journals, reports...)	Pharmacy practice by Jason hall

Course Description Form

72. Course Name:					
Industrial pharmacy I					
73. Course Code:					
10301447					
74. Semester / Year:					
4 th years/ 2 nd semester					
75. Description Preparation Date:					
18/2/2024					
76. Available Attendance Forms:					
Theory and practical/ attendance					
77. Number of Credit Hours (Total) / Number of Units (Total)					
45					
78. Course administrator's name (mention all, if more than one name)					
Name: dr ali kassim Email:					
79. Course Objectives					
Course Objectives		Industrial pharmacy's mission where the student studies equipment used in pharmaceutical manufacturing facilities, including mixing, packaging, and mixing.			
80. Teaching and Learning Strategies					
Strategy	<ol style="list-style-type: none"> 1. Theoretical lectures 2. Blackboard 3. Projector device 4. PowerPoint presentation 5. Educational laboratories 6. Electronic lectures 7. Scientific and practical research 8. Office Research 				
81. Course Structure					
Week	Hou rs	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
Week 1-2	7	The principles pharmaceutical	The principles of pharmaceutical processing; mixing; fluid mixing; f	Power Point,	Formative, summative,

		processing	characteristics; mechanisms of mixing equipments; batch continuous mixing; mixer select solid mixing theory and particu solid variables; forces and mechanis	Problem Solving, Practicalitie	quiz, exam
Week 3-4	7	pharmaceutical application; measurement methods	Milling; pharmaceutical applicat size measurement methods; theory energy of commenuation; types of m factors influencing milling; selectio mill techniques; specialized dry methods	Power Point, Problem Solving, Practicalitie	Formative, summative, quiz, exam
Week 5-6	7	Drying: definit purpose; humi measurement	Drying: definition; purpose; humi measurement; theory of drying; dry of solids, and classification of dr specialized drying methods.	Power Point, Problem Solving, Practicalitie	Formative, summative, quiz, exam
Week 7-8	7	Clarification filtration	Clarification and filtration: The filter media; filter aids; selection drying method; non-sterile and ste operations; integrity test equipments and systems (commet and laboratory).	Power Point, Problem Solving, Practicalitie	Formative, summative, quiz, exam
Week 9-10	7	Sterilization; valida of methods; micro death kinetics	Sterilization; validation of meth microbial death kinetics; methods sterilization (thermal and non-therm mechanisms; evaluation.	Power Point, Problem Solving, Practicalitie	Formative, summative, quiz, exam
Week 11	3	Pharmaceutical dos form design	Pharmaceutical dosage form des pre-formulation; prelimi evaluation; bulk characterizat solubility and stability analysis.	Power Point, Problem Solving, Practicalitie	Formative, summative, quiz, exam
Week 12-13	7	Pharmaceutical dos forms	Pharmaceutical dosage forms; ste products; development; formulat production; processing; quality cont	Power Point, Problem Solving, Practicalitie	Formative, summative, quiz, exam

Course Description Form

84. Course Name:					
Industrial pharmacy II					
85. Course Code:					
10301557					
86. Semester / Year:					
1 st semester/5 th year					
87. Description Preparation Date:					
18/2/2024					
88. Available Attendance Forms:					
Theory and practical/ attendance					
89. Number of Credit Hours (Total) / Number of Units (Total)					
45					
90. Course administrator's name (mention all, if more than one name)					
Name: dr ali kassim Email:					
91. Course Objectives					
Course Objectives		Industrial pharmacy's mission where the student studies the equipment used in pharmaceutical manufacturing facilities, including mixing, blend and Packaging.			
92. Teaching and Learning Strategies					
Strategy	<ol style="list-style-type: none"> 1. Theoretical lectures 2. Blackboard 3. Projector device 4. PowerPoint presentation 5. Educational laboratories 6. Electronic lectures 7. Scientific and practical research 8. Office Research 				
93. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	10	Tablets; role in therapy;	Pharmaceutical dosage forms: Tablets; role in	Power Point, Problem	Formative, summative,

		advantages and disadvantages	therapy; advantages and disadvantages; formulation; properties; evaluation; machines used in tableting; quality control; problems; granulation, and methods of production; excipients and types of tablets	Solving, Practicalities	quiz, exam
2	4	Tablet coating principles; properties	Tablet coating; principles; properties; equipments; processing; types of coating (sugar and film); quality control, and problems	Power Point, Problem Solving, Practicalities	Formative, summative, quiz, exam
3	3	Capsules: Hard gelatin capsules	Capsules: Hard gelatin capsules; materials; production; filling equipments; formulation; specifications and techniques.	Power Point, Problem Solving, Practicalities	Formative, summative, quiz, exam
4	2	Soft gelatin capsules	Soft gelatin capsules: Manufacturing methods; nature of capsule shell and content; processing control; stability	Power Point, Problem Solving, Practicalities	Formative, summative, quiz, exam
5	2	Micro-encapsulation;	Micro-encapsulation; core and coating materials; stability; equipments and methodology.	Power Point, Problem Solving, Practicalities	Formative, summative, quiz, exam
6	3	Modified (sustained release) dosage forms	Modified (sustained release) dosage forms; theory and concepts; evaluation and testing formulation.	Power Point, Problem Solving, Practicalities	Formative, summative, quiz, exam
7-7	3	Liquids: Formulation; stability equipments	Liquids: Formulation; stability and equipments.	Power Point, Problem Solving, Practicalities	Formative, summative, quiz, exam
8-9	3	Suspensions: Theory and application	Suspensions: Theory and formulation and evaluation	Power Point, Problem Solving, Practicalities	Formative, summative, quiz, exam
11-12	3	Emulsions: Theory and application	Emulsions: Theory and application; types; formulation; equipments	Power Point, Problem Solving,	Formative, summative,

			and quality control	Practicalit	quize, exam
13-14	3	Semisolids	Semisolids: Percutaneous absorption; formulation; types of bases (vehicles)	Power Point, Problem Solving, Practicalities	Formative, summative, quize, exam
94. Course Evaluation

Course Description Form

96. Course Name:	
Dosage form design	
97. Course Code:	
10301568	
98. Semester / Year:	
2 nd semester/5 th year	
99. Description Preparation Date:	
18/2/2024	
100. Available Attendance Forms:	
Theory and practical/ attendance	
101. Number of Credit Hours (Total) / Number of Units (Total)	
30	
102. Course administrator's name (mention all, if more than one name)	
Name: dr amera	
Email:	
103. Course Objectives	
Course Objectives	<p>1/ To help students understand the principles and factors that influence the designing of dosage forms</p> <p>2/ Learn the applications of these principles to the practice pharmaceutical industry</p> <p>3/ Learn the Pre-formulation studies ; physical description, microscopic examination, Melting point; phase rule; particle size; polymorphism; solubility.</p> <p>4/ Learn the Formulation consideration: Excipients; definitions and types.</p> <p>5/ Learn the Biopharmaceutical considerations.</p> <p>6/ Learn Bioavailability and bioequivalency; FDA requirements</p> <p>7/ Learn the Pharmacokinetic principles</p>
104. Teaching and Learning Strategies	
Strategy	Power Point Presentation, Tutorials (Pen and Whiteboard), Problem Solving
105. Course Structure	

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	2		Pharmaceutical consideration: The need for the dosage form.	Power Problem solving	po Formative, summative, quiz
2	2		General consideration of the dosage form	Power Problem solving	po Formative, summative, quiz
3	2		Pre-formulation; physical description, microscopic examination.	Power Problem solving	po Formative, summative, quiz
4	2		Melting point; phase transition; particle size; polymorphism; solubility.	Power Problem solving	po Formative, summative, quiz
5	2		Permeability; pH; partition coefficient; pka; stability; kinetics; shelf life	Power Problem solving	po Formative, summative, quiz
6	2		Rate reaction; enhanced stability.	Power Problem solving	po Formative, summative, quiz
7	2		Formulation consideration: Excipients; definition and types; appearance; palatability; flavoring	Power Problem solving	po Formative, summative, quiz
8			Mid-Term exam		
9	2		Sweetening; coloring pharmaceuticals; preservatives; sterilization; preservatives selection	Power Problem solving	po Formative, summative, quiz
10	2		Biopharmaceutical considerations: Principle drug absorption; dissolution of the drugs.	Power Problem solving	po Formative, summative, quiz
11	2		Bioavailability and bioequivalency; FDA requirements	Power Problem solving	po Formative, summative, quiz
12	2		Assessment of bioavailability bioequivalence among different products.	Power Problem solving	po Formative, summative, quiz
13	2		Pharmacokinetic principles Half life; clearance; dosage regimen considerations	Power Problem solving	po Formative, summative, quiz
14	2		Drug discovery and development design	Power Problem solving	po Formative, summative, quiz
15			Final-term exam		
106.					

Quizzes 5%
 Reports 5%
 Mid term Exam 20%
 Final-term Exam 70%

107. Learning and Teaching Resources

Required textbooks (curricular books, if any)	1- Pharmaceutical Dosage Forms and Drug Delivery Systems by Haward A. Ansel. Latest Edition.
Main references (sources)	1- Pharmaceutical Dosage Forms and Drug Delivery Systems by Haward A. Ansel. Latest Edition. 2- Handbook of pharmaceutical excipients by Raymond C Rowe et al, Latest edition
Recommended books and references (scientific journals, reports...)	1-Applied Biopharmaceutics & Pharmacokinetics, by Leon Shargel et al, seventh edition. 2- British pharmacopeia, latest edition.
Electronic References, Websites	1- https://www.fda.gov/industry/structured-product-labeling-resources/dosage-forms .
